Read the following text and choose the correct answer: [20 marks]

You must not start evaluating the possibilities until you have finished generating them. Why ? because there are two sides to the human brain- a creative side and a logical side. It is impossible to get both sides working well at the same time. In this case , you need the creative side first, to **generate** the alternatives, then the logical side, to evaluate each one. There is very rarely only one possible solution to a problem.
